  public static String calculateGrade(double percentage) {
    if (percentage >= 90) {
      return "A+";
    } else if (percentage >= 80) {
      return "A";
    } else if (percentage >= 70) {
      return "B";
    } else if (percentage >= 60) {
      return "C";
    } else if (percentage >= 50) {
      return "D";
    } else {
      return "F";
    }
  }
  public static void main(String[] args) {
    Scanner scanner = new Scanner(System.in);
    // Input: Number of subjects
    System.out.print("Enter the number of subjects: ");
    int numSubjects = scanner.nextInt();
    // Input: Marks obtained in each subject
    double[] marks = new double[numSubjects];
    double totalMarks = 0;
    for (int i = 0; i < numSubjects; i++) {
```

```
System.out.print("Enter marks for subject " + (i + 1) + " (out of 100): ");
    marks[i] = scanner.nextDouble();
    totalMarks += marks[i];
}

double averagePercentage = totalMarks / numSubjects;
String grade = calculateGrade(averagePercentage);
System.out.println("\n--- Results ---");
System.out.printf("Total Marks: %.2f\n", totalMarks);
System.out.printf("Average Percentage: %.2f%%\n", averagePercentage);
System.out.println("Grade: " + grade);
scanner.close();
}
```

## **Output:**

```
Enter the number of subjects: 3
Enter marks for subject 1 (out of 100): 95
Enter marks for subject 2 (out of 100): 90
Enter marks for subject 3 (out of 100): 88

--- Results ---
Total Marks: 273.00
Average Percentage: 91.00%
Grade: A+
```
